

# DIY *Orange Basil* Cutting Board Conditioner

- 1/3 cup organic fractionated coconut MCT oil
- 2 tsp. grated beeswax or beeswax pastilles
- 5 drops Orange or Lemon essential oil
- 1 drop Basil essential oil

## Directions

1. In a double boiler over medium-low heat, combine oil and wax.
2. Whisk regularly as wax melts.
3. When fully melted, pour hot liquid into storage container. Tins are a wonderful option here, but a wide mouth mason jar works too.
4. When cool, but not yet hardened, add essential oils.
5. Label container with product name.
6. Store in a cool, dark place.

## To Use

1. Using a clean cloth, rub evenly onto wooden board, counter, bowl, or utensils.
2. Use a clean cloth to wipe away excess from wood. You could also let it set overnight, and then wipe free the next day.
3. Repeat monthly or as needed.
